

Secure and resilient co-location data centres for business critical IT

Datum Datacentres develops and operates highly-connected carrier and cloud neutral co-location data centres for enterprise and service providers.

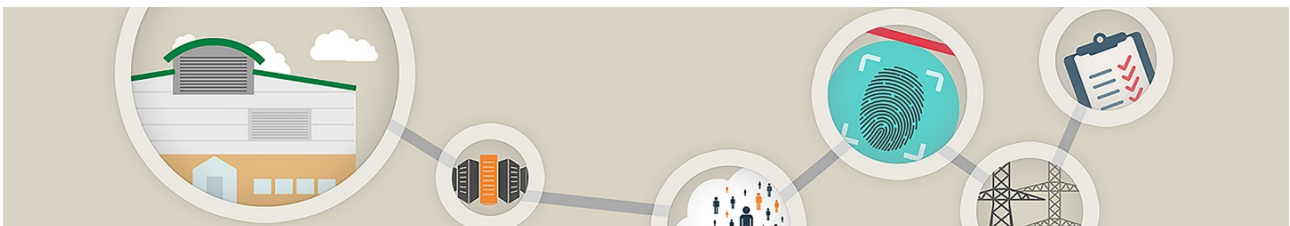

Operating from a government grade secure park outside the M25, Datum offers the security and resilience demanded by our private and public sector clients serving vertical markets from Finance and Insurance through IT Security Services and Defence.

Datum is also the trusted partner of several companies from the FTSE 250 and Fortune 500.

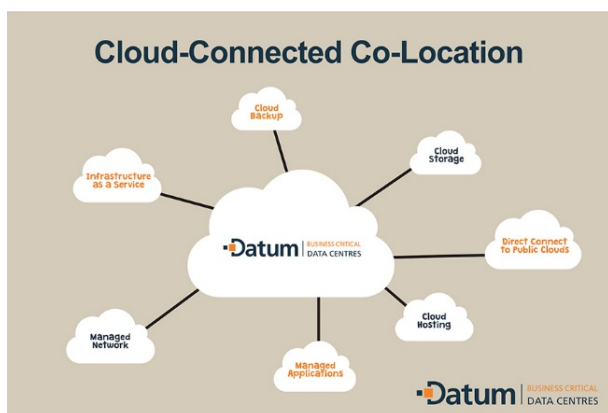

Officially opened in January 2013, Datum's flagship data centre is an environmentally intelligent facility, built in accordance with the latest Green IT efficiencies; delivering highly energy efficient and flexible co-location, with a market-leading operational Power Usage Effectiveness (PUE).

- 360° embedded security
- Service enhanced co-location
- High performance data centre
- Cloud connected DR facility for Greater London

Cloud connected co-location

Outsourcing the data centre to a well-connected co-location facility is often the most logical way forward for organisations looking for an efficient and cost-effective way to optimise hosting, securing and connecting their IT infrastructure regardless of the mix of cloud strategies under consideration.

To support your Hybrid IT strategy, Datum Connect provides direct access to networks, managed services and cloud platforms.

And through Datum Connect, Datum supports its premium co-location service with agile and secure direct interconnection to cloud platforms, as well as an ecosystem of service providers, cloud hosting businesses and carriers.

Government-grade security and resilience

Multi-layered approach to security designed to meet the requirements of industry recognised certifications including ISO 27001 and PCI DSS. Highly secure campus location characterised by manned perimeter security and overlaid with our own data centre security to meet the highest standards.

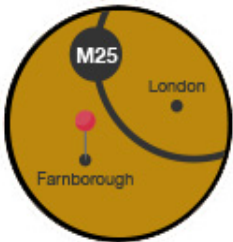

100% uptime service level agreement

Assurance against the risks of data centre downtime through 100% uptime SLA supported by our highly resilient co-location infrastructure that exceeds Tier 3 specifications. Committed and experienced operations team. Fully 2N power infrastructure ensures your co-location is always available.

Cloud-connected co-location

Access to Applications Hosting, IT Services, Cloud Platforms, Network Services, Content Management and more. Direct connection to deliver increased security, ability to scale and reduced costs. Enablement for hybrid cloud strategies. Datum Connect provides a searchable directory of co-located services.

Strategic London-edge location

Secure campus location with excellent transport links conveniently located to the West of London, close to the M3, M4 and M25, and high speed 40 minute train time from Farnborough to London Waterloo. Excellent onsite services and connected latency to Slough and the City of London of less than 1 millisecond.

Environmentally efficient operation

Adiabatic cooling solutions to maximise energy efficiency additionally supported by ISO 50001 accreditation and by the use of electricity generated only from renewable sources, and therefore exempt from the Climate Change Levy.

Flexible capacity and service

Proactive service reporting and account management with dedicated client service manager to deliver a co-location service tailored to desired business outcomes. Detailed reporting includes BMS data for transparency and advanced DCIM to centralise monitoring and management.

Data Centre Tours
