

Connected DR for Greater London

Datum Farnborough offers a connection-rich highly secure and resilient DR facility just outside the M25, with easy access to London and the motorway network.

Disaster recovery

Digital trading, interconnected business, the rise in electronically stored data and consumer expectations demand that business critical IT is always-on and always available.

If an unforeseen event caused unplanned downtime, could your organisation afford the resulting costs in lost revenue, damaged reputation, employee dissatisfaction, and even potentially fines or other financial penalties?

Increasingly business of all sizes are recognising the value of Business Continuity (BC) and Disaster Recovery (DR) strategies.

Datum Farnborough provides a secure facility outside the M25, particularly suitable for

organisations looking for a DR solution outside the higher risk London conurbation, enabling access to the software, data, and/or hardware that are needed to resume normal, critical business functions.

Datum delivers:

- Highly secure and resilient co-location data centre strategically positioned outside the M25
- Easy access from London via road or rail
- Located just off junction 4a of the M3
- Latency to the City of less than a millisecond
- Situated on a government grade ListX site
- Connected primary or secondary site for back-office or front-of-office DR solutions
- **Datum Connect** community of service providers for business continuity, hosting, cloud, back-up solutions

Datum supports data backup and disaster recovery, integral to Business Continuity Planning

Our highly secure and resilient facility provides an effective solution within a dual site strategy including resilient internet connections for Cloud backup.

Because downtime is not an option, Datum offers greater than Tier 3 resilience backed by our assurance of 100% uptime SLA and fully supported by

2N infrastructure.

Datum is employed as the primary or secondary solution by clients in Financial Services, Local Government, IT Services and Defence for critical back office and front office applications.

Government-grade security and resilience

Multi-layered approach to security designed to meet the requirements of industry recognised certifications including ISO 27001 and PCI DSS. Highly secure campus location characterised by manned perimeter security and overlaid with our own data centre security to meet the highest standards.

100% uptime service level agreement

Assurance against the risks of data centre downtime through 100% uptime SLA supported by our highly resilient co-location infrastructure that exceeds Tier 3 specifications. Committed and experienced operations team. Fully 2N power infrastructure ensures your co-location is always available.

Cloud-connected co-location

Access to Applications Hosting, IT Services, Cloud Platforms, Network Services, Content Management and more. Direct connection to deliver increased security, ability to scale and reduced costs. Enablement for hybrid cloud strategies. Datum Cloud Hub provides searchable directory of co-located services.

Strategic London-edge location

Secure campus location with excellent transport links conveniently located to the West of London, close to the M3, M4 and M25, and high speed 40 minute train time from Farnborough to London Waterloo. Excellent onsite services and connected latency to Slough and the City of London of less than 1 millisecond.

Environmentally efficient operation

Adiabatic cooling solutions to maximise energy efficiency additionally supported by ISO 50001 accreditation and by the use of electricity generated only from renewable sources, and therefore exempt from the Climate Change Levy.

Flexible capacity and service

Proactive service reporting and account management with dedicated client service manager to deliver a co-location service tailored to desired business outcomes. Detailed reporting includes BMS data for transparency and advanced DCIM to centralise monitoring and management.
