

Service-enhanced co-location partnership

Datum Farnborough provides flexible leading-edge co-location enhanced by enterprise class service management and proactive reporting.

Service matters

Pressures on internal data centres to provide enhanced connectivity, security and resilience increase the attraction of external co-location as a purpose-built solution that can flex and grow as the business changes.

Whether your kit is already in a co-location data centre or whether this is your first evaluation of the benefits of moving outside your own data centre or computer room, the transition from one location to another can be daunting. How do you weigh up the alternatives? How do you know what you need? How do you make it happen? And most of all, how do you ensure that you do not end up feeling that you have lost control of your IT deployment?

Datum's service-enhanced co-location works with you from initial planning to on-going support, developing a relationship that to ensure clients have the data centre solution you need to support your business goals.

Datum delivers:

Datum delivers proactive client service within our leading edge data centre, trusted by a wide range of organisations, large and small, for whom security, resilience and service matter.

Helping hand – We work with clients to deliver a co-location solution that is aligned to their business outcomes.

Community of support - Datum Connect ecosystem of partners provide clients with supporting services

for design, migration, networking, cloud, hosting.

Connection-rich – Datum offers a carrier neutral choice of connectivity providers as well as direct connect to Cloud Platforms to support working hybrid cloud infrastructures.

Cost-effective and efficient co-location – Datum is a trusted partner for organisations looking for cost and efficiency savings through co-location or cloud, with pricing based on power usage.

Datum's service-based co-location supports a beneficial working partnership

Whether this is a first time outsource to co-location, an expansion of existing provision or a move from another provider, Datum works with clients to simplify the challenge ahead.

Datum provides clear pricing, flexible contracts, transparent processes, and proactive client service with regular detailed reports so that you are always kept fully informed.

We establish a working relationship with you to build

a co-location service suited to your business needs, connecting you as required to a community of service providers within the **Datum Connect** community who can assist with complementary services such as migration, design, network, cloud, hosting, cabling and more.

Check out our **Datum Connect** Guides to Co-location in the Resource Centre on our website.

Government-grade security and resilience

Multi-layered approach to security designed to meet the requirements of industry recognised certifications including ISO 27001 and PCI DSS. Highly secure campus location characterised by manned perimeter security and overlaid with our own data centre security to meet the highest standards.

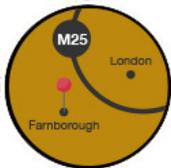

100% uptime service level agreement

Assurance against the risks of data centre downtime through 100% uptime SLA supported by our highly resilient co-location infrastructure that exceeds Tier 3 specifications. Committed and experienced operations team. Fully 2N power infrastructure ensures your co-location is always available.

Cloud-connected co-location

Access to Applications Hosting, IT Services, Cloud Platforms, Network Services, Content Management and more. Direct connection to deliver increased security, ability to scale and reduced costs. Enablement for hybrid cloud strategies. Datum Cloud Hub provides searchable directory of co-located services.

Strategic London-edge location

Secure campus location with excellent transport links conveniently located to the West of London, close to the M3, M4 and M25, and high speed 40 minute train time from Farnborough to London Waterloo. Excellent onsite services and connected latency to Slough and the City of London of less than 1 millisecond.

Environmentally efficient operation

Adiabatic cooling solutions to maximise energy efficiency additionally supported by ISO 50001 accreditation and by the use of electricity generated only from renewable sources, and therefore exempt from the Climate Change Levy.

Flexible capacity and service

Proactive service reporting and account management with dedicated client service manager to deliver a co-location service tailored to desired business outcomes. Detailed reporting includes BMS data for transparency and advanced DCIM to centralise monitoring and management.
